EXPERIENCE

Position · Founder · SwiftUI self-custody money app · private TestFlight beta — 2026 – now

- Cut investing in stocks, crypto and cash to **one balance and one Face ID confirmation**, with price, fee and minimum received shown first.
- Hid chains, bridges and gas from the screen; own product and design end to end.

Aarambh Labs · Founder & CEO · product studio — Sep 2024 – now

- Delivered **$100k+** in client work for founders in India and the UAE, including Quotiq, Stellaray, insiders.bot and Provn (Camp Network).
- Run a five-person studio: fixed price in 24 hours, live product in about 14 days, client owns the code. Own discovery, scoping, design and delivery.
- Lifted outbound throughput 60%+ with an AI outbound engine (research, enrichment, sequences), so two people run all of sales; 150K+ impressions in 45 days.

Supermission · Founder · AI trading terminal — Jul 2025 – Sep 2026

- Grew the public beta to **271+ traders, 5,000+ trades and $400k+ volume** on Base, Polygon and Robinhood Chain; open-sourced the code.
- Made Polymarket trades one click on AI signals: email-to-wallet sign-up with no seed phrase or gas; four AI agents argue every market and a judge combines their views.
- Owned scoping, UI, backend and every release; ran trader outreach on X and rewrote onboarding copy at each funnel drop-off. Joined NVIDIA Inception and Claude for Startups.

1000xdegen · Founder · delta-neutral farming on Papertrade — 2026

- Shipped a live long/short pair that closes itself: the server closes both sides at one price before either can be liquidated, even with the tab shut; users stake the $PAPER earned for USDC payouts.

Earlier — Dec 2021 – Sep 2024

- Axelar Network, Research Collective (2024): ran 12+ cross-chain DeFi and dev-tooling research tracks; built the learning hub 50+ researchers used.
- Business development and community at BFC NFT, SemiKolan and Rabble (2021 – 2024): creator collabs, campaigns, partner deals.

PRODUCTS

Firangi Tota	Open-source browser game on India's freedom struggle in English and Hindi, 4 chapters, every fact sourced. Built solo.	2026
Humly	A few photos become a 30-second video with an original song, in 6 languages. Built solo; Gemini writes, Lyria sings.	2026
OMO AI	iOS app that runs an Indian housing society: UPI maintenance, voice complaints, visitor logs, receipts. Live pilot.	2026
Unsaid	Lists the decisions an app brief leaves open or contradicts, with a question for each. Built solo; free, private.	2026

COMMUNITY

Bhopal DAO · Co-founder — 2022 – now

- Grew a three-person Discord into a **5,000+** builder community in central India; 16 public events with Ethereum Foundation, AirDAO, Story and Monad.
- Organised Road to Devcon 2K24 at UIT RGPV with Ethereum Foundation Devcon and AirDAO: 411 registered, 200+ attended, 30+ teams.

Speaker, Google #BuildWithAI workshop — 2026
Host, ETH Builders Day (3 editions) — 2024 – 25
Speaker, Web3Conf India, Goa — 2023
Mentor, LNMHacks 7.0 (365+ hackers) — 2025
Host, Arweave India builder event — 2025
